\*1 Figures represent print times only for the Epson test sample image as shown, produced on Plain (draft-fine modes). Print speeds are engine only with total throughput time dependent on workflow configuration, paper type, software, file format/size, print resolution, ink coverage, networking, and other factors.

\*2 Users need to choose to configure the machine with either light light black or violet. Once this choice has been made, it is final and cannot be undone or switched at a later time. 99% Pantone coverage requires configuration with violet ink. Configured with light light black provides 98% Pantone coverage.
